EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In the specification, page 30, after paragraph 89 a new paragraph listed as [0089.1] and the text --FIGS. 8aa-8dd illustrate an alternate embodiment of the present invention.—has been added.

Allowable Subject Matter

Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance: the intervertebral disc having a first baseplate with a central post having a ball at the end, a second baseplate with a convex structure forming a curvate socket and the ball accommodated by the socket. The second baseplate formed with two parts housing a spring member between the two parts to accommodate the compressive loads of the vertebrae was found to be novel. The prior art did teach spring members between intervertebral baseplates. The prior art also teaches that ball heads on a post are used between vertebral baseplates. However, the prior art failed to teach the combination of features with the baseplate having a ball accommodated in a socket formed on the convex structure of an opposing baseplate that housed a spring member.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
